

Company: All ECNZ certified companies and products

Document number: EVS-13-58

Issue Date: 14 March 2014

Subject: Validity of Environmental Choice NZ certification and certificate expiry

As part of its independent product verification activities, EnviroSpec regularly refers to and reviews Environmental Choice NZ certificates.

These are valid for a period of 12 months and are regularly renewed via annual re-auditing activities carried out by Environmental Choice NZ.

For any given time that a product is deemed to have a valid Environmental Choice NZ certification, the manufacturer and certified product names are notified on the Environmental Choice NZ website.

A print out of the Environmental Choice NZ website, showing nominated products is therefore a suitable and satisfactory set of evidence that the product is certified at the time, and remains certified until removed from the website altogether.

Rather than re-printing and re-uploading a new certificate each 12 month period, EnviroSpec now provides a dated web print-out from the relevant section of the Environmental Choice NZ website, with the associated url for traceability purposes.

This is now supplied as evidence that the product is certified, until it is removed by Environmental Choice NZ from its own website, at which point any reference to product ECNZ certification will be removed from the EnviroSpec website and all associated EnviroSpec documentation accordingly.

Wattyl is a paint and surface coatings company that produces a broad range of paints, varnishes, lacquers and special purpose protective coatings. Our products are used by individuals, contract painters and industrial customers. With operations in Australia and New Zealand, the Wattyl Group employs over 2000 people. The company's origins date back to 1915 where, in an Australian backyard, H.R. Walters developed a treatment for reviving French-polished furniture. This innovative product, known as 'Crystal Veneer' became an immediate success and laid the foundation of Wattyl's future success.

From its humble backyard beginnings to its listing on the Australian Stock Exchange in 1959, Wattyl through innovation, research and development, acquisitions, and organic growth has become a leading Australasian-owned paint manufacturer.

Taubmans EcoProof is an example of our innovation and commitment to a healthy environment. Taubmans EcoProof is a unique system, it is the only paint that the Asthma Respiratory Foundation of New Zealand have approved as part of their Sensitive Choice stable of products as being better suited for people with asthma and allergies.

Below is a list of Wattyl products that have the Environmental Choice licence:
