

**Company:** All GECA certified companies and products

**Document number:** EVS-13-59

**Issue Date:** 10 December 2015

**Subject: Validity of Good Environmental Choice Australia certification and certificate expiry**

As part of its independent product verification activities, EnviroSpec regularly refers to and reviews Good Environmental Choice Australia certificates.

These are valid for a period of 12 months and are regularly renewed via annual re-auditing activities carried out by Good Environmental Choice Australia.

For any given time that a product is deemed to have a valid Good Environmental Choice Australia certification, the manufacturer and certified product names are notified on the Good Environmental Choice Australia website.

A print out of the Good Environmental Choice Australia website, showing nominated products is therefore a suitable and satisfactory set of evidence that the product is certified at the time, and remains certified until removed from the website altogether.

Rather than re-printing and re-uploading a new certificate each 12 month period, EnviroSpec now provides a dated web print-out from the relevant section of the Good Environmental Choice Australia website, with the associated url for traceability purposes.

This is now supplied as evidence that the product is certified, until it is removed by Good Environmental Choice Australia from its own website, at which point any reference to product GECA certification will be removed from the EnviroSpec website and all associated EnviroSpec documentation accordingly.

# Marmoleum

Licensee Name: Forbo Flooring Systems

Website: <http://www.forbo-flooring.com.au/>

GECA Standard: GECA 25-2011 v2 Floor Coverings

Licence: FFS-2011

Green Star applicable

**Forbo Marmoleum** stands for versatility, sustainability and durability. It combines ecological and economic values that help bring modern and contemporary architecture to life. Marmoleum is a natural floor created from all natural ingredients such as linseed oil, rosins, wood flour, cork flour, limestone and organic pigments on a jute backing. It is the most sustainable floor in the resilient flooring category.
