

Company: All GreenTag GreenRate certified companies and products

Document number: EVS-15-000

Issue Date: 9 December 2015

Subject: Validity of GreenTag - GreenRate certification and certificate expiry

As part of its independent product verification activities, EnviroSpec regularly refers to and reviews GreenTag GreenRate certificates.

These are valid for a period of 12 months and are regularly renewed via annual re-auditing activities carried out by GreenTag.

For any given time that a product is deemed to have a valid GreenTag GreenRate certification, the manufacturer and certified product names are notified on the GreenTag website.

A print out of the GreenTag website, showing nominated products is therefore a suitable and satisfactory set of evidence that the product is certified at the time, and remains certified until removed from the website altogether.

Rather than re-printing and re-uploading a new certificate each 12 month period, EnviroSpec now provides a dated web print-out from the relevant section of the GreenTag website, with the associated url for traceability purposes.

This is now supplied as evidence that the product is certified, until it is removed by GreenTag from its own website, at which point any reference to product GreenTag GreenRate certification will be removed from the EnviroSpec website and all associated EnviroSpec documentation accordingly.

Signed:

A handwritten signature in black ink, appearing to read "Alex Reiche".
