

**Company:** All ECNZ certified companies and products

**Document number:** EVS-13-58

**Issue Date:** 14 March 2014

**Subject: Validity of Environmental Choice NZ certification and certificate expiry**

As part of its independent product verification activities, EnviroSpec regularly refers to and reviews Environmental Choice NZ certificates.

These are valid for a period of 12 months and are regularly renewed via annual re-auditing activities carried out by Environmental Choice NZ.

For any given time that a product is deemed to have a valid Environmental Choice NZ certification, the manufacturer and certified product names are notified on the Environmental Choice NZ website.

A print out of the Environmental Choice NZ website, showing nominated products is therefore a suitable and satisfactory set of evidence that the product is certified at the time, and remains certified until removed from the website altogether.

Rather than re-printing and re-uploading a new certificate each 12 month period, EnviroSpec now provides a dated web print-out from the relevant section of the Environmental Choice NZ website, with the associated url for traceability purposes.

This is now supplied as evidence that the product is certified, until it is removed by Environmental Choice NZ from its own website, at which point any reference to product ECNZ certification will be removed from the EnviroSpec website and all associated EnviroSpec documentation accordingly.

# Wattyl (NZ) Limited (Licence No 0709054)

**Telephone:** 0800 928 895 (WATTYL)

**Website:** [Click here](#)

**Download the Wattyl profile brochure** [here](#)

Wattyl is a paint and surface coatings company that produces a broad range of paints, varnishes, lacquers and special purpose protective coatings. Our products are used by individuals, contract painters and industrial customers. With operations in Australia and New Zealand, the Wattyl Group employs over 2000 people. The company's origins date back to 1915 where, in an Australian backyard, H.R. Walters developed a treatment for reviving French-polished furniture. This innovative product, known as 'Crystal Veneer' became an immediate success and laid the foundation of Wattyl's future success.

From its humble backyard beginnings to its listing on the Australian Stock Exchange in 1959, Wattyl through innovation, research and development, acquisitions, and organic growth has become a leading Australasian-owned paint manufacturer.

Taubmans EcoProof is an example of our innovation and commitment to a healthy environment. Taubmans EcoProof is a unique system, it is the only paint that the Asthma Respiratory Foundation of New Zealand have approved as part of their Sensitive Choice stable of products as being better suited for people with asthma and allergies.

# Laminex New Zealand (Licence 3208041)

**Email:** [Click here](#)

**Website:** [Click here](#) laminexnewzealand.co.nz

Laminex New Zealand forms part of the Laminates and Panels division of [Fletcher Building](#) Products Ltd, and we aim to be New Zealand's trusted business partner for decorative surfaces and panel products offering expert knowledge and exceptional value to our customers. With market leading brands in our portfolio including Formica, Laminex, Melteca, Lakepine MDF and Caesarstone, Laminex New Zealand offers residential and commercial solutions for all interior spaces. From benchtops and cabinetry, through to structural flooring, wall lining and commercial joinery, there are products available to meet all these application requirements. Laminex New Zealand has manufacturing facilities throughout New Zealand and prides itself on supporting the NZ building industry with strong industry associations and memberships. With one of the country's best distribution networks, Laminex New Zealand has metropolitan and regional branches ensuring the highest level of local support and service to our customers.

Laminex New Zealand supports the belief that a company needs to be responsible for its actions – socially, ethically, and environmentally.

From the very start of the manufacturing process to when the product arrives at to your door – sustainability is a present and considered element. Through our *GREENfirst®* programme we employ a range of strategies to support our sustainability goals, including the use of sustainable and recycled materials as raw material or fuels, the use of renewable energy—particularly biomass—and the introduction of new technologies to improve energy efficiency.:-

Laminex New Zealand has been awarded the Environmental Choice label for a range of decorated laminate and wood panel products.
